PROFILE

Data Engineer with 4 years of experience designing, shipping and running end-to-end data platforms: real-time ingestion through change data capture (Debezium, Kafka), batch Spark pipelines orchestrated with Airflow, an analytical warehouse, reporting and observability. I joined as an intern and grew my final-year project into core company platforms, from business need to deployment and operations.

I build reliable, documented, long-lived solutions, and I want to bring that expertise to ambitious Data & AI projects.

KEY SKILLS

Data Engineering · Data Platform · CDC / Streaming (Debezium, Kafka) · ETL / ELT (Spark, Airflow, dbt) · Data Warehouse (StarRocks) · SQL & Python · BI (Power BI, Superset) · Observability (ELK, Grafana) · Docker & Kubernetes · CI/CD · Terraform · C# / .NET

EXPERIENCE

Data & DevOps Engineer — Nov 2022 – present

Be ys Outsourcing Services Madagascar · Antananarivo · Full-time

C# / .NET developer intern from June 2022, hired full-time in November 2022.

Data platform and centralized analytical warehouse

- **Context:** business application data spread across several PostgreSQL and MySQL databases; manual reporting took more than a day each week.
- **Delivery:** designed and shipped a StarRocks data warehouse fed in real time by change data capture (Debezium, Kafka) from 2 to 5 source databases, plus batch ETL pipelines in Python and Apache Spark, scheduled and monitored with Apache Airflow.
- **Outcome:** data available within minutes; 10+ automated reports and KPI dashboards (Power BI, Apache Superset); more than a day of manual reporting saved every week.

StarRocks · Debezium · Kafka · Apache Spark · Apache Airflow · Python · SQL · PostgreSQL · MySQL · Power BI · Superset

Company-wide observability

- **Governance:** wrote and rolled out the company logging policy (format, levels, retention).
- **Delivery:** centralized ELK stack (Elasticsearch, Logstash, Kibana) collecting logs from 10+ applications and servers.
- **Outcome:** Kibana dashboards, automated alerting and Grafana monitoring: incidents detected within minutes instead of hours.

Elasticsearch · Logstash · Kibana · Grafana · alerting

DevOps, automation and business applications

- Containerized services with Docker and deployed them on Kubernetes.
- CI/CD pipelines to automate builds and deployments.
- Built a C# / .NET production quality-control application (performance and quality tracking).

Docker · Kubernetes · CI/CD · Git · Linux · C# / .NET

Software Developer, Odoo (internship) Sep 2021 – Mar 2022
PSI Madagascar · Antananarivo

- Fleet management module in Odoo (Python, PostgreSQL): GPS trip tracking, vehicle maintenance and activity.

Web Developer, Drupal / PHP (internship) Jun 2021 – Sep 2021
Esokia · Antananarivo

- Built features for Drupal websites in PHP, team work with Git.

TECHNICAL SKILLS

Languages	Python, SQL, C# / .NET
Data & streaming	Apache Spark, Apache Airflow, Debezium, Kafka, dbt
Databases	StarRocks, PostgreSQL, MySQL, SQL Server, MongoDB
BI & reporting	Power BI, Apache Superset, Grafana, Kibana
Observability	Elasticsearch, Logstash, Kibana, Grafana, alerting
DevOps & IaC	Docker, Kubernetes, CI/CD, GitLab, Git, Terraform, Linux
Other	Odoo (Python), PHP / Drupal

STRENGTHS

- **End-to-end ownership:** from a final-year project to two core company platforms in production.
- **Production mindset:** I design, ship and run what I build every day (monitoring, alerting, maintenance).
- **Standards and governance:** wrote and rolled out a logging policy shared by every team.
- **Work capacity:** two master's degrees earned alongside a full-time data engineering job.
- **Knowledge sharing:** documented solutions, built for teams to take over.

EDUCATION

Master's degree (M2) MBDS – Mobile, Big Data & Systems Integration
Université Côte d'Azur (France) · 2023 – 2024
Final-year project: data warehouse and ELK platform deployed in production.

Master of Science – Software Engineering
IT University (Madagascar) · 2022 – 2023

Bachelor's degree – Software Development
IT University (Madagascar) · 2018 – 2022
